

SOLAR BUZZ

**ENJOY, OUTDOORS
NO BITES**

The Problem

- 1 million + deaths globally each year
- Mosquito Breeding: Contained, Still water provides ideal conditions for mosquito breeding

Why Change?

Mosquito Breeding:

Contained, still water provides ideal conditions for mosquito breeding

Disease Transmission:

Mosquitoes are vectors for various diseases, including malaria, dengue, Zika, and West Nile virus.

The Solution

Meet the RIPPLER !

The Rippler

A water RIPPLE DEVICE that DISRUPTS MOSQUITO BREEDING grounds _ for slower reproduction

Meet Rippler

Solar Power

Vibration

Motor / Battery

Key Partnerships

- Key Partnerships
- Manufacturing partners: Collaborating with manufacturers for production.
- Distribution partners: Partnering with retailers for physical product distribution.
- Technology partners: Collaborating on advanced vibration technology or power sources.

Customer Segments

- Residential homeowners
- Commercial establishments
(restaurants, hotels, etc.)
- Public spaces (parks,
recreational areas)
-

Value Proposition

- Eco-friendly: Solar-powered, no harmful chemicals
- Effective: Repels mosquitoes and water
- Cost-effective: Low-cost solution
- Durable: Built to withstand various weather conditions
- Safe: Harmless to humans and pets

Market Size

Eco-friendly: Solar-powered, no harmful chemicals

Effective: Repels mosquitoes and water

Cost-effective: Low-cost solution

Durable: Built to withstand various weather conditions

Safe: Harmless to humans and pets
